APPENDIX 8.8A

**Environmental Justice** 

# **Environmental Justice**

This report addresses compliance of the San Francisco Electric Reliability Project (SFERP) with the principles expressed in Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (1994). The Executive Order requires that "each Federal agency shall make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects...on minority populations and low-income populations." Although both the California Energy Commission (CEC) and the Bay Area Air Quality Management District (BAAQMD) are in the process of developing an environmental justice policy, neither has yet issued guidance on compliance. The CEC, however, has issued the approach it uses in preparing its Environmental Justice Analysis. This report is generally consistent with that approach.

## **Key Phases in the Analytical Process**

The CEC environmental justice analytical process has three key phases: (1) focused outreach to, and involvement of, the minority and low-income population in the decision making process; (2) a screening-level analysis to determine the potential for environmental justice issues; and, (3) if indicated by the screening results, a more detailed analysis of the relative distribution and intensity of impacts. These three phases and how they were conducted are discussed below.

#### Outreach and Involvement

The Executive Order requires agencies to ensure effective public participation and access to information. Consequently, a key phase of environmental justice analysis is outreach to the potentially affected minority or low-income population to discover issues of importance that may not otherwise be apparent. The project's outreach efforts fall into two categories:

(a) Outreach efforts prior to filing an Application for Certification (AFC); and (b) Post-filing outreach.

#### Outreach Efforts Prior to Filing the Application for Certification

The following activities and actions were undertaken to ensure public awareness and involvement by the local community:

- On May 29, 2001, the City and County of San Francisco made a finding that:
  - "The Energy Resources Conservation and Development Commission (California Energy Commission) has recognized Southeast San Francisco as a minority community entitled to environmental justice." (Ordinance 124-01)
- Between November 2001 and August 2002, City staff hosted nine neighborhood meetings and three meetings with representatives of the San Francisco business

- community to solicit input and participation in public forums on energy policy (Resolution 827-02)
- In December 2002, the City approved an Electric Resource Plan that incorporated the community input from the above meetings.
- Met with Potrero Hill Power Plant Task Force Advisory Meeting, March 19, 2003
- Met with Southeast Facility Commission Meeting, March 26, 2003
- Introduced project to residents of the Southeast Sector in Partnership with SFPD Bayview District Police (R.O.S.E.S.), April 4, 2003
- Met with Potrero Hill Merchants Association on April 8, 2003
- Met with Potrero Hill Neighborhood Flea Market & Bazaar on April 12, 2003
- Met with Bayview Merchants on April 15, 2003
- Provided information tables at both: Earthday, Heron's Head Park, and Southeast Community Center Environmental Justice Meeting, April 26, 2003
- Made presentation about project to San Francisco Planning and Urban Research Association (SPUR) on May 7, 2003
- Made presentation about project to Building Owners & Managers Association (BOMA), May 15, 2003
- Attended Whitney Young Parents Association and answered questions, May 2, 2003
- Gave a 10-minute presentation to Bayview Hunters Point Project Area Committee (PAC), Health and Environment Subcommittee on May 21, 2003
- Answered questions from Bayview Merchants Association about the project, May 27, 2003
- Met with Bayview Rotary Club on May 28, 2003
- Met with Bayview Stakeholders Breakfast, Dago Mary's, June 4, 2003
- Made presentation to Dogpatch Neighborhood Association on June 6, 2003
- Introduction and brief summary of Electrical Reliability Project to attendees at Potrero Power Plant Task Force, June 26, 2003
- Met with Supervisor Sophie Maxwell and Intervenors/Interested Parties on July 16 and 30, and August 13, 2003
- Met with approximately 50 people at Potrero Neighborhood House on August 28, 2003
- Met with approximately 35 people at San Francisco Department of Public Health, September 4, 2003
- Met with approximately 40 to 50 people at Southeast Community Center, September 9, 2003

 Met with approximately 35 people at the California College of Arts & Crafts on September 20, 2003

#### Post Filing Outreach Efforts

As described in Section 4, Environmental Justice, the City intends to convene public workshops to solicit input in the development of a PM10 mitigation and community benefits package. Further, during the power plant licensing process, the California Energy Commission typically takes the following outreach actions:

- Mails written notice to all property owners within 1000 feet of the site and within 500 feet of any linear corridor
- Publishes notices in the local newspaper announcing public workshops and hearings
- Provides access to information by submitting copies of key documents to local libraries and providing materials via a web page
- Holds hearings and workshops in the local community
- Assigns a public advisor to assist the public in participating in the process

#### Screening-level Analysis

As shown in Table 8.8A-1, the population of a 6-mile-radius area surrounding the power plant site is predominantly minority, with the minority segment comprising 57.7 percent of the total population (see Figure 8.8A-1, and Attachment 8.8A-1). By comparison, according to the 2000 Census data, the minority population within San Francisco is only slightly lower at 56.36 percent. In this same 6-mile area, the low-income population is 11.3 percent of the total (see Figure 8.8A-2 and Attachment 8.8A-2) as compared to the City average of 12.7 percent.

TABLE 8.8A-1
Minority Population

	Total Population <sup>a</sup>	Minority Population <sup>b</sup>	Percent Minority	Percent Low Income
1-mile radius	11,802	4,991	42.3%	12.8%
6-mile radius	788,674	455,041	57.7%	11.3%
City and County of San Francisco	776,733	437,824	56.4%	12.7%
Bay Area <sup>c</sup>	6,783,760	3,391,556	50.0%	
State of California	33,871,648	18,054,858	53.3%	

Source: Potrero Unit #7 FSA, Socioeconomics Table 3: Minority Populations

Based on this data, and determinations made both by the City of San Francisco and the CEC (CEC, 2002), a minority population exists within the affected area. Therefore, additional

<sup>&</sup>lt;sup>a</sup> Source: Census 2000.

<sup>&</sup>lt;sup>b</sup> Minority includes non-white and white-Hispanic populations.

<sup>&</sup>lt;sup>c</sup> Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma Counties.

analysis is warranted to determine if the project would have a "disproportionately high and adverse impact" on that population.

To assist in this analysis, the minority population within a 1-mile radius was analyzed. Figure 8.8A-3 shows each census block, whether the block contained greater than 50 percent minority population, and the number of residents living in that census block during the 2000 Census.

# Detailed Examination of the Distribution of Impacts on Segments of the Population

This Application for Certification documents potential impacts of the project. Each subject area in Section 8 of the AFC provides a detailed analysis of the project. To the extent that significant adverse impacts may result, mitigation measures are proposed to reduce project impacts to a less than significant level.

The discussion below focuses on the issue areas of common concern for similar types of projects and those that have commonly been of concern in environmental justice complaints around the Bay Area. It summarizes the potential project impacts to the identified minority community(ies) and the effectiveness of the proposed mitigation measures. A more detailed analysis for each area is contained in Section 8 of the AFC.

#### Air Quality

Section 8.1 of the AFC addresses the potential impacts of the project on air quality. As described in that section, ambient air quality impact analyses for the facility were conducted to satisfy the CEC requirements for impacts from criteria pollutants ( $NO_2$ , CO,  $PM_{10}$ , and  $SO_2$ ) and noncriteria pollutants during project construction and operation. To determine a project's air quality impacts, the modeled concentrations are added to the maximum background ambient air concentrations and then compared to the applicable ambient air quality standards.

Maximum ground-level impacts due to operation of the SFPUC project are shown together with the ambient air quality standards in AFC Table 8.1-25. Using conservative assumptions, the results indicate that the SFPUC project will not cause or contribute to violations of any state or federal air quality standards, with the exception of the state  $PM_{10}$  and state and federal  $PM_{2.5}$  standards. For these pollutants, existing ambient air concentrations already exceed the state standards. Accordingly, the City intends to convene public workshops to solicit input into the development of a PM10 mitigation and community benefits package.

According to modeling performed for the project, emissions from the turbines will comply with air quality standards set by USEPA.

#### **Public Health**

The screening health risk assessment (SHRA) was conducted to determine expected impacts on public health of the non-criteria pollutant emissions from the facility. The SHRA estimated the excess offsite cancer risk to the maximally exposed individual (MEI), as well as indicated any adverse excess effects of non-carcinogenic compound emissions. Pollutant-specific unit risk factors are the estimated probability of a person contracting cancer as a

result of constant exposure to an ambient concentration of  $1\,\mu g/m^3$  over a 70-year lifetime. The locations of the maximum modeled pollutant concentrations are shown in Appendix 8.1C, Figure 8.1C-1. An evaluation of the potential excess non-cancer health effects from long-term (chronic) and short-term (acute) exposures has also been included in the SHRA. The SHRA results for the SFERP are presented in Table 8.8A-2, and the detailed calculations are provided in Appendix 8.1C.

#### **TABLE 8.8A-2**

Screening Health Risk Assessment Results

Corcoming Frediti Filent Recognition Freduce	
Excess Cancer Risk to Maximally Exposed Individual:	0.02 in one million
Excess Cancer Risk at Nearest Residence:	0.01 in one million
Excess Cancer Risk at Nearest Workplace:	0.003 in one million
Excess Acute Inhalation Hazard Index:	0.03
Excess Chronic Inhalation Hazard Index:	0.002

#### Noise

Noise survey results show that the noise level of the most affected residential receptor (ML1) is primarily affected by vehicular traffic.

Noise from the project is predicted not to exceed 54 dBA at ML1 and ML4, the residential noise monitoring locations shown in Figure 8.5-1. This is consistent with the CEC's 5 dBA over background significance guideline and complies with LORS. No census blocks with more than 50 percent minority population will be affected by a significant increase in noise (i.e., more than a 5 dBA above existing levels).

#### Hazardous Materials

The project will use aqueous ammonia (29 percent) in the selective catalytic reduction (SCR) system to reduce NOx emissions. In performing an offsite consequence analysis, the worst-case accidental release scenario assumed the aqueous ammonia storage tank was punctured and the entire storage tank's contents was spilled into a catch basin or bermed area located beneath the tank. As shown by Figure 8.8A-4, the distance to the CEC's extremely protective 75 ppm ammonia concentration extends just off the project site's eastern boundary, which is on the Potrero Power Plant site. Additionally, ammonia concentrations expected to occur to the north, south, and west boundaries would be significantly lower than 75 ppm due to the ammonia storage tank's location at the eastern side of the project site (further away from public and residential receptors). The worst case accident is not expected to result in an offsite release greater than 5 ppm (the odor threshold of ammonia) to the north, south, or west of the site.

### Conclusion

The screening-level environmental justice analysis indicated that a minority population exists in the surrounding project vicinity. Therefore, specific attention was given to the impact categories that are commonly of concern for this type of project, and those that have

historically been identified as being of concern—air quality, public health, noise, and hazardous materials—to determine if there were project impacts that adversely affected minority areas.

Air pollutant emissions and, hence, impacts on public health from the plant will be minimized by the use of best available control technology, the purchase of local emission offsets, and the development of a PM10 mitigation and community benefits package.

Noise emissions will comply with local ordinances and will not affect minority populations because of their distance from the plant.

Even during a worse-case scenario of a rupture of the ammonia storage tank, the ammonia gas would not escape in sufficient concentrations as to cause long-term health impacts.

The proposed project is consistent with the CEC's standards for environmental justice.

APPENDIX 8.81

# Records of Conversations with Public Service Providers

Call To: Matt Bamberger IBEW Local 6

**Business Representative** 

**Phone No.:** 415-861-5752 **Date:** January 5, 2004

Call From: Fatuma Yusuf Time: 3:35 PM

Message Taken By:

**Subject:** Availability of skilled labor in the San Francisco area

I called the International Brotherhood of Electrical Workers (IBEW) Local 6 to find out whether the union had enough electricians to fill the jobs for the SFPUC SERP project. Matt Bamberger informed that there were tons of trained electricians. Currently there are over 400 electricians, 100 of them local and 300 nonlocal. Besides, the union can always call upon others within the local area or from outside the local area. Thus, he did not forsee any problems filling the jobs.

Fillingim-Selk\_School Enrollment\_Email.txt
From: Jeff Fillingim-Selk [jfillin@muse.sfusd.edu]
Sent: January 14, 2004 1:17 PM

To: Yusuf, Fátumá/SAC

Subject: Current Enrollment Counts

Hello Fatuma,

Attached is a spreadsheet that approximates the form that you sent to Claudia Beliz. I hope that it is acceptable. I am working on providing you projection numbers. I should have some numbers or a status for you by tomorrow AM, if I don't please don't hesitate to contact me.

The data in the attached document are derived from the student file that was used to report the CBEDS numbers for the Fall, 2003.

I hope that this is helpful.

Peace,

Jeff Fillingim-Selk Operations Manager, EPC 241-6029 (office) 241-6087 (fax)

Call To: Lt. Juarez San Francisco Fire Department

**Phone No.:** 415-558-3225 **Date:** January 5, 2004

Call From: Fatuma Yusuf Time: 10:47 AM

Message Taken By:

**Subject:** San Francisco Fire Department

The closest station to the proposed project site is Station No. 25 which is located at 3501 3<sup>rd</sup> Street. Station No. 25 has one fire engine with one officer and 3 fire fighters. The next nearest station is Station No. 37, located at 798 Wisconsin. Station No. 37 has one fire engine with one officer and 3 fire fighters. The closest station after Station No. 37 is Station No. 9 which is located at 2245 Gerald Street. Station No. 9 has one engine company with 3 fire fighters, one truck company with one officer and 4 fire fighters and an ambulance.

Response time from Station No. 25 to a call from the project site is 3 and a half minutes. The response times from the other stations is within 3 to 5 minutes.

Currently, there is a lot of ongoing construction in San Francisco and the fire department has been able to meet the needs of the public. Thus, no impacts are anticipated during the construction (as well as operation) phase of the project.

Lt. Juarez asked that I confirm the above information with the chief's office (Chief Trevino). I called the chief's office several times (1/5/04, 1/6/04, 1/7/04, 1/8/04, 1/14/04, 1/13/04, 1/29/04) and even sent a fax on 1/5/04 that was addressed to Chief Mario Trevino. But I never received any feedback from the Chief's office.

Fatuma,

we do not track city data in our normal processing, however we can offer you a trend with this info. for \$300.

We do track county info. Numbers for San Francisco county are as follows :

Properties:

34832

Rooms: 139.19 ROOM RATE:

Let me know if you would like the trend or if I can help you with anything else.

Happy Holidays!

Number of hotel/motel rooms Subject:

Hi Bobby,

Hope you are enjoying the Holidays. If you are able to help, I'd really appreciate it very much if you could send me the following information for the City and County of San Francisco:

> Number of hotels/motels Number of hotels/motel rooms Average rate hotel/motel room rates.

Thanks and a Wonderful and Prosperous New Year.

Fatuma Yusuf, Ph.D. Economist CH2M HILL 2485 Natomas Park Dr. Suite 600

Call To: Larry Lee Plumbers #38

**Business Agent** 

**Phone No.:** 415-626-2000 **Date:** January 6, 2004

Call From: Larry Lee Time: 10:20 AM

Message

Taken By: Fatuma Yusuf

**Subject:** Availability of skilled labor

Larry Lee returned my call from earlier in the morning. He told that Plumbers #38 believes that there are adequate numbers of workers to meet the project needs.

Call To: Contact: Captain Mike Puccinelli

San Francisco Police Department

Bayview Station 201 Williams Avenue San Francisco, CA

**Phone No.:** 415-671-2300 **Date:** January 6, 2004

Call From: Fatuma Yusuf Time: 3:45 PM

**Subject:** San Francisco Electric Reliability Project

Captain Mike Puccinelli said that the Bayview station has approximately 100 sworn officers of which one is the captain, 4 are lieutenants, 16 are sergeants and the remaining are patrol officers. There are 5 patrol cars that patrol the 5 sectors served by the station. There are night and daytime patrols and there could be one or 2 officers in each patrol car.

The response time to an emergency call from the project site depends on the priority of the call. The SFPD uses a prioritization system whereby calls are categorized as either A, B or C. Calls categorized as 'A' are typically responded to within 2 minutes. 'A' types of calls are calls involving ongoing crimes or crimes in progress, e.g., burglary in progress, assault, shooting, stabbing, etc. Response times to 'B' calls are longer than 2 minutes whereas 'C' calls are responded to whenever. 'B' type of calls are those involving crimes that have already happened, e.g., a burglary has already occurred and the officer is required to take down a report. 'C' type of calls are those typically dealing with minor infractions.

Call To: Stan Warren San Francisco Building Trades

Secretary/Treasurer Council (BTC)

**Phone No.:** 415-467-3330 **Date:** January 5, 2004

Call From: Fatuma Yusuf Time: 4:40 PM

Message Taken By:

**Subject:** Availability of skilled labor

Stan Warren informed me that the BTC could probably supply all the labor requirements of the project. He, however, pointed he can only predict upto a year. If the project starts more than a year from now, he suggested that SFPUC should work closely with contractors.
